Potential Health effects: Sanding, sawing, drilling, routing, etc. of this material during fabrication may
   generate airborne nuisance dust, fines, chips etc. This dust may cause eye, nose, skin, and upper
   respiratory tract irritation. Use of appropriate personal protection and/or engineering controls (such
   as local exhaust ventilation) should be employed whenever sanding, sawing, drilling, routing, etc. of
   this material. Refer Section 4 for first aid and measures.

Section 4: FIRST AID AND MEASURES

**Eye Contact:** No hazard for product as sold. During cutting, sawing, fabrication or routing or any such operations dust or fines may get generated. Use of PPE recommended during these operations. If dust gets into the eyes, immediately rinse affected eye for at least 15 minutes with clean water. If irritation persists, seek medical attention.

**Skin Contact:** No hazard for product as sold when handled properly. However, they may cause cuts or abrasions if not handled properly. During cutting, sawing, fabrication or routing or any such operations fines or dust may get generated. If excess dust gets into the skin, remove contaminated clothing and wash before reuse. Wash skin with soap and water. Seek medical attention if irritation persists.

**Ingestion:** Not likely to occur. During cutting, sawing, fabrication or routing or any such operations fines or dust may get generated. If dust gets into mouth, rinse with clean water. Seek medical attention if necessary.

**Inhalation:** No hazard for product as sold. During cutting, sawing, fabrication or routing or any such operations fines or dust may get generated. Use of PPE recommended during these operations. If excess dust is inhaled, move to fresh air. Seek medical attention if symptoms such as wheezing and/or shortness of breath occur.

In case the products in form of heavy boards are required to be handled manually, insist on wearing safety shoes.

Section 5: FIRE FIGHTING MEASURES

**Flash Point:** Not applicable

**Flammability Classification:** Not available

**Explosion risk due to Mechanical Impact:** Not applicable

**Explosion risk due to Static Discharge:** Not applicable for product as sold. Safety precautions and proper ventilation as recommended by NFPA-68 for Class ST-1 dusts should be followed for dust/chips arising during operations like fabrication, milling, sawing etc., from presenting an explosion hazard.

**Suitable Extinguishing Media:** CO₂, water, foam or dry chemical powder

**Possible Products of Combustion:** Various oxides of carbon and nitrogen.

**Firefighters:** Firefighters should wear self-contained breathing apparatus and full fire-fighting turnout gear.
Section 6: ACCIDENTAL RELEASE MEASURES

Personal Precautions & Emergency procedures: Material is non-hazardous as sold.

Environmental precautions: None

Methods for Clean-up: Recover undamaged materials for reuse or reclamation. Sweep or pick up scrap material and place in disposal containers.

Section 7: HANDLING AND STORAGE

Handling: Institute necessary housekeeping measures to keep the product free from dust. Minimize dust generation and accumulation and prevent dust from entering eyes. Do not breathe dust. Avoid prolong skin contact with dust and/or filings. Cut, drill, saw, sand and finish, etc. in well-ventilated areas. Never allow dispersion of dust into air.

Storage: Store in dry, well-ventilated area and keep away from strong chemicals, solvents and excessive heat. Prolonged or extreme heat can cause damage to the surface.

Engineering Controls: Provide adequate ventilation to maintain exposure levels below applicable limits wherever fabrication works generate dust or fines. All dust control equipment, collection equipment and material transport equipment are provided with explosion relief vents. The system must be designed to effectively remove the dust generated and ensures prevention of dust escaping to work areas.

Eye/face Protection: Wear safety glasses when sawing, sanding, drilling or routing.

Skin Protection: Wear appropriate gloves when installing, transporting, sawing, cutting, drilling, routing or handling during different fabrication stages.

Foot Protection: No special protection required unless heavy boards are handled. Wear safety shoes in such cases.

Respiratory Protection: Where airborne concentrations of dust are expected to exceed the allowable exposures approved respirator should be worn, chosen based on the form and concentration of the contaminant. Respirator usage must be in accordance with the OSHA Respiratory Protection Standard, 29 CFR 1910.134.

General Hygiene: Wash thoroughly after sawing, cutting, drilling, or routing. Have eyewash facilities at different points of work.
